

The 7th IEEE World Forum on the Internet of Things - WFIoT2021

20-24 June 2021 // Hilton Riverside Hotel, New Orleans, Louisiana, USA

The Impact
of Artificial
Intelligence
on IoT

STUDENT PAPER CONTEST

General Chairs

- **Magdy Bayoumi**

University of Louisiana at Lafayette, USA

- **Adam Drobot**

Open TechWorks

Verticals and Topical Program Chair

- **Adam Drobot**

Open TechWorks

Technical Papers Chairs

- **Ahmed Abdelgawad**

Central Michigan University

- **Soumya Datta**

EURECOM, France

Student Paper Contest Chairs

- **Khaled Elgazzar**

Ontario Ins. of Tech, Canada

- **Dmitri Perkins**

NSF, USA

- **Kumar Yelamarthi**

Central Michigan Univ., USA

IEEE WF-IoT 2021 would like to invite will continue the tradition of holding a Student Paper Contest. Papers submitted for the Student Paper Contest must have the presenting student as the first author on the paper. The first author must be a registered student at the time of paper submission. Additional authors are allowed as long as the student presenter is the first author. Competitions are a key component of academic events, as they comprise effective means for making rapid progress in specific topics. By posing a challenge to the academic community, competition organizers contribute to pushing the state of the art in specific subjects and/or to solve research problems of practical importance. We invite to all WF-IoT community to submit challenge papers to be part of the WF-IoT 2021 competition program. We especially encourage competition papers from emerging fields or new application scenarios relevant to the Internet of things. Interdisciplinary topics that could attract a significant cross-section of the community are highly valued.

For paper submission and paper contest option, follow the instruction in <https://epapers.org/wf-iot2021>
