

The 7th IEEE World Forum on the Internet of Things - WFIoT2021

14 June–31 July 2021 // New Orleans, Louisiana, USA
Hybrid Event: Virtual and In Person

Call for Participation and Attendance – Vertical and Topical Tracks at WFIoT2021

Mark Your Calendar June 14 – July 31, 2021

The [7th IEEE World Forum on the Internet of Things](https://wfiot2021.iot.ieee.org/) will be a hybrid event with most of the Vertical and Topical Tracks held as virtual online sessions conducted during a two-week period July 12-24, 2021. The virtual sessions will be two hours in duration and are scheduled for 10:30am-12:30pm U.S. Eastern Time each day. We will also hold a limited number of Vertical and Topical Track sessions in-person in New Orleans, Louisiana, June 20-24, 2021. You can find the overall program schedule for the World Forum at <https://wfiot2021.iot.ieee.org/program/>.

The Vertical and Topical Tracks will address the practical aspects of IoT implementation, adoption, deployment, and operation. The V&T Tracks are aimed at a general but knowledgeable audience with an emphasis on IoT challenges and successes in industry, the public sector, and major demonstrations and trials conducted by the research community. The theme for 2021 is *The Impact of Artificial Intelligence on IoT*. The topics for the tracks were specifically chosen because they are of high interest to IoT globally as well as the area surrounding New Orleans and the Gulf region. The format for each track is highly interactive and consists of presentation by leading experts, providers, and end-users from around the world, to address technical, business, and experiential issues. Each session within a track focuses on a specific subject that is also of interest locally and consists of in-depth presentations, moderated panels or roundtables, and an open question period from the audience. The list of high-level topics is shown below. A more detailed description of each track can be found through the [WFIoT2021 Vertical and Topical Program Page](#).

Verticals	Topicals
<ul style="list-style-type: none"> ●Agriculture ●Environment and Ecology ●Healthcare and Medical ●Industry and Manufacturing ●Power and Energy ●Smart Cities 	<ul style="list-style-type: none"> ●Artificial Intelligence ●Communications & Networking ●Computing ●Data and Digitization ●Security , Privacy, and Trust ●Sensors and Sensor Systems

If you are interested in being a presenter and speaker or would like to recommend a speaker please use the instructions on the WFIoT2021 website for the [Call for Vertical and Topical Track Speakers](#). All presentations are by invitation. If any invited presenter would also like to submit a paper for publication then that option is available if desired. All submitted papers will be peer reviewed for acceptance in IEEE Xplore and there is no guarantee that papers submitted by invited presenters will be accepted. We do require all speakers and presenters to register for the Conference. We look forward to having you join us and participate in the exciting program for IEEE WF-IoT 2021.
